The screenshot displays the Visual Studio IDE. The top pane shows the source code for a C# program. The code defines an internal class `Program` with a `Main` method. Inside `Main`, two integer variables `X` and `Y` are initialized to 10 and 20, respectively. A `Console.WriteLine` statement uses string interpolation to print the equation `10 + 20 = 3,000%`. The bottom pane shows the Microsoft Visual Studio Debug Console, which contains the output of the program: `Equation: 10 + 20 = 3,000%`. Below the output, a message indicates that the process exited with code 0 (0x0).

```
search task1
Program
Main(string[] args)
0 references
internal class Program
{
    0 references
    private static void Main(string[] args)
    {
        int X = 10;
        int Y = 20;
        Console.WriteLine(value: $"Equation: {X} + {Y} = {X + Y:p0}");
    }
}

Microsoft Visual Studio Debug Console
Equation: 10 + 20 = 3,000%
C:\Users\Level 303\source\repos\search task1\search task1\bin\Debug\net9.0\search task1.exe (process 28172) exited with
code 0 (0x0).
